

Malvestio Aria Acute Care Bed

Like all Malvestio products, ARIA beds are developed with a commitment to creating efficient healthcare equipment focused on the quality of life of the patient. In particular, “Care for quality” is the duty they take on towards the efficiency of their work and their products, with which they contribute to the progress of healthcare and society.

- All functions are accessible via the control panel built into the side rails on both sides of the bed.
- The controls are intuitive and the software provides a multilingual interface to the operator. Bed adjustments, functions and alerts can be personalised by setting the desired parameters. The touch screen is user friendly with intuitive sequences allowing for easy operation by a nurse or carer.
